EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

To correct numerous typographical errors, please amend claim 9 as follows:

9. A closed battery comprising:

an electrode element consisting of a positive electrode, a negative electrode, and a separator;

an electrolyte;

a battery container accommodating the electrode element together with said electrolyte;

and

a closing member fitted in the inner periphery of an open end portion of said battery container to close the open end portion of the battery container;

wherein said closing member consists of a metal substrate, a valve element which is provided in said metal substrate and defined by a break line so as to serve as a releasing chip such that when the internal pressure of the battery is elevated, the valve element is bent from a bending fulcrum which does not have a break line so as to provide the metal substrate with an opening portion for releasing the internal pressure, and a metal foil which is adhered to the inner surface of the metal substrate; and

Art Unit: 1745

wherein said metal foil is connected to a lead member for conducting a current from said electrode element to a closing cap, and when said valve element operates to release internal pressure in the battery, said lead member is electrically disconnected from the metal foil to interrupt the current.
